

I was installing Hyperion 11.1.2 on windows 2008 server. During installation I got a very generic error

EPMINS-01018: Cannot install the selected component Performance Management Architect Dimension Server. Click Help to see possible reasons.

EPMINS-01050: Cannot install a selected product because IIS is not installed. You must install IIS before you can proceed with the installation

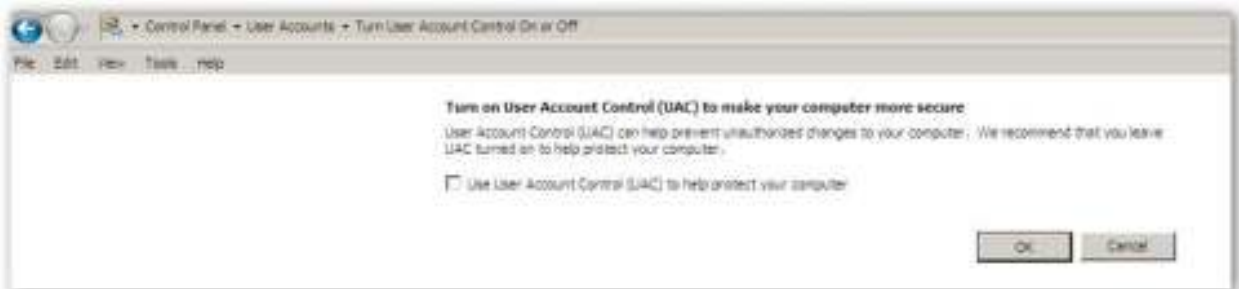

After some research I found out error is because of User Access Control feature in Windows 2008

Solution:-

1. Click **Start**, and then click **Control Panel**.
2. In **Control Panel**, click **User Accounts**.
3. In the **User Accounts** window, click **User Accounts**.
4. In the **User Accounts** tasks window, click **Turn User Account Control on or off**.

5. If UAC is currently configured in Admin Approval Mode, the **User Account Control** message appears. Click **Continue**.
6. Clear the **Use User Account Control (UAC) to help protect your computer** check box, and then click **OK**.

7. Click **Restart Now** to apply the change right away, or click **Restart Later** and close the **User Accounts** tasks window.
